

YAHYA

Associate AWS Cloud Engineer | AWS Certified | 3+ Years Experience

+971 50 858 9118 | ykinwork1@gmail.com | linkedin.com/in/ykinwork1 |

Abu Dhabi, UAE

PROFESSIONAL SUMMARY

Associate AWS Cloud Engineer with over 1 year of dedicated cloud experience and 3+ years of total IT infrastructure expertise. Proven track record in orchestrating scalable production environments using Terraform and managing containerized workloads on ECS. Specialized in FinOps-driven cost optimization (15% reduction) and high-availability design (99.9% uptime). Seeking to leverage deep technical knowledge of AWS networking and security-first automation to drive operational excellence in an enterprise environment.

TECHNICAL SKILLS

Cloud Platform:	AWS (EC2, S3 Vectors, VPC, IAM, RDS, Lambda, Route 53, CloudFront)
Infrastructure as Code:	Terraform (Advanced), AWS CloudFormation, Systems Manager (SSM)
DevOps & CI/CD:	Docker, Amazon ECS (Fargate), AWS CodePipeline, GitHub Actions
Security & Compliance:	AWS WAF, IAM (Least Privilege), KMS, Secrets Manager, GuardDuty
Monitoring & FinOps:	CloudWatch, CloudTrail, VPC Flow Logs, AWS Cost Explorer
Networking:	FortiGate/Palo Alto NGFW integration, VPC Peering, Transit Gateway, NACLs

PROFESSIONAL EXPERIENCE

Associate Cloud Engineer

Nov 2024 – Dec 2025

Minute KSA

Riyadh, Saudi Arabia

- Orchestrated the migration of manual provisioning to modular **Terraform** templates, reducing environment deployment time by 73% and ensuring 100% configuration consistency across DEV/PROD tiers.
- Dynamically scaled **ECS/Fargate** workloads on **Graviton5** instances, maintaining **99.9% uptime** through proactive performance tuning and automated load balancing.
- Executed monthly cloud financial audits via **AWS Cost Explorer**, identifying \$1,200/month in waste and reducing total cloud expenditure by **15%**.
- Refactored **IAM** architecture to implement RBAC and Least Privilege for 50+ users, passing internal audits with zero high-risk security findings.
- Configured custom **CloudWatch** dashboards and SNS alerts, reducing Mean Time to Detection (MTTD) by **25%** for critical resource exhaustion and security anomalies.
- Automated RDS Multi-AZ backups and EBS snapshot lifecycles using **Python (Boto3)**, reducing manual disaster recovery workflows by **40%**.
- Supported large-scale enterprise workload migrations from Mobily Cloud to **AWS**, configuring secure VPC networking and validating post-migration connectivity.
- Led the implementation of **AWS CodePipeline** and **CodeBuild** CI/CD workflows to automate application deployments and infrastructure updates.
- Developed **Python** and **Bash** scripts for Linux service automation, log parsing, and API-based cloud resource validation.

Network Infrastructure Engineer

Jun 2022 – Sep 2024

Fabee Technologies

Hyderabad, India

- Managed **Cisco Catalyst** switching environments, implementing VLAN segmentation, STP optimization, and core routing (OSPF, BGP) for high-availability enterprise connectivity.
- Administered **FortiGate** and **Palo Alto NGFWs**, deploying NAT, IPS/IDS policies, App-ID traffic control, and secure remote access via IPsec VPNs.
- Optimized **Cisco ISE** for RADIUS-based authentication, managing policy sets and endpoint profiling to enforce identity-driven network access control.

- Resolved L1/L2 network incidents via **ServiceNow**, utilizing SolarWinds and SNMP monitoring to identify bandwidth trends and meet strict SLA targets.
- Assisted with enterprise-wide **Cisco Catalyst SD-WAN** deployments to improve multi-site connectivity and WAN redundancy.
- Conducted regular firewall rule reviews and policy optimizations, ensuring strict adherence to the principle of least privilege.

PROJECTS & LABS

- **RAG-Powered Technical Support via Amazon Bedrock:** Engineered a production-ready Retrieval-Augmented Generation (RAG) pipeline utilizing **Amazon Bedrock Knowledge Bases** and **Anthropic Claude 3** to provide instant, context-aware answers from enterprise technical documentation.
 - Automated the ingestion and vectorization of technical guides into an **OpenSearch Serverless** vector store for efficient semantic search.
 - Developed **Python-based Lambda** functions to orchestrate the retrieval of relevant document chunks and generate precise, grounded responses.
 - Provisioned the entire infrastructure (IAM, S3, OpenSearch, Bedrock) using **Terraform**, ensuring secure, least-privilege data access.
 - Integrated an API-driven frontend via **Amazon API Gateway**, enabling real-time query processing with sub-second response times.
- **EVE-NG Hybrid Cloud & Multi-Site Network Simulation Lab:** Architected a comprehensive, virtualized enterprise network environment within EVE-NG to simulate secure hybrid cloud connectivity and resilient multi-site routing architectures.
 - **SD-WAN & Routing:** Deployed multi-site connectivity utilizing complex **BGP** routing and **SD-WAN** overlays to ensure high-availability WAN links.
 - **Perimeter Security:** Configured virtualized **FortiGate** firewalls to simulate secure edge defenses, NAT, and encrypted tunneling to cloud gateways.
 - **Enterprise Identity:** Integrated virtual **Windows Server** environments to replicate active directory services and complex **LDAP** queries.
 - **Access Control:** Simulated centralized authentication and authorization workflows utilizing **AAA** frameworks for endpoint security.
 - **Infrastructure Monitoring:** Provisioned lightweight Linux distribution servers to actively monitor network health, simulated traffic flows, and system logs across the topology.

CERTIFICATIONS

- **AWS** Certified Solutions Architect – Associate
- **Cisco** Certified (CCNP & CCNA)
- **HashiCorp** Certified: Terraform Associate
- **Fortinet** NSE 4

EDUCATION

B.Tech – CS Engineering
Global Institute

2018 – 2022
Hyderabad, India

LANGUAGES & ADDITIONAL INFO

- **Visa Status:** Visit Visa / Employment Eligible – **Availability:** Immediate Joining
- **Languages:** English (Proficient), Arabic (Basic), Hindi (Native)

ADDITIONAL EXPERIENCE / LABS

- **SAP:** Familiar with SAP landscape architecture, secure communication (SAPRouter, SNC), and infrastructure/network security fundamentals.
- **PAM:** Familiar with privileged access management concepts including credential vaulting, session management, and CyberArk architecture (Vault, CPM, PSM).
- **Compliance:** Familiar with industry security standards and frameworks including ISO 27001, PCI-DSS, SOC 2, and CIS Controls for regulatory alignment.
