

YAHYA

Cloud Engineer | AWS & Azure Certified | 1.5 Years Experience

+91 8096278589 | ykinwork1@gmail.com | linkedin.com/in/ykinwork1 | Hyderabad, India

PROFESSIONAL SUMMARY

Cloud Engineer with 1.5 years of experience designing, deploying, and operating secure, highly available cloud infrastructure. Experienced in cloud operations, infrastructure automation with Terraform, production workload management, and incident troubleshooting. Hands-on with VPC design, IPsec VPN, IAM (RBAC), WAF, CI/CD workflows, and automation using Python and Bash. Skilled in monitoring, logging, and implementing operational best practices to build resilient, secure, and scalable cloud environments, with exposure to backup, disaster recovery, and continuous service improvement.

TECHNICAL SKILLS

Cloud Ecosystem:	AWS (VPC, EC2, ECS, Lambda, SNS, SQS, S3, CloudFront), Azure (VNet), GCP
Security & Identity:	AWS WAF , IAM (RBAC, least privilege), Security Groups, Entra ID, TLS/SSL encryption
Automation & IaC:	Terraform (GitOps, S3/DynamoDB state), Ansible (Jinja), Python , Bash
CI/CD & DevOps:	AWS CodePipeline , CodeBuild, GitHub Actions, Git, Ubuntu , Rocky Linux
Monitoring & Operations:	CloudWatch , log monitoring, Change/Incident Management , SLA Resolution
Resilience (Exposure):	Backup and disaster recovery concepts (snapshots, multi-AZ, basic restore workflows)

PROFESSIONAL EXPERIENCE

Associate Cloud Engineer

Nov 2024 – Mar 2026

Minute KSA

Riyadh, Saudi Arabia

- Designed and deployed highly available **AWS VPC** architectures for **DEV/PROD**, privatizing databases and crucial services using private subnets, NAT, and Security Groups.
- Hosted a secure **monolith application** on **ECS** behind an **ALB** and **WAF**, utilizing **AWS Lambda**, **SNS**, and **SQS** for asynchronous resource distribution while enforcing strict network, access, and data security.
- Provisioned infrastructure via **Terraform** using a strict **GitOps** model, managing state locking securely with **S3** and **DynamoDB**.
- Hosted secure, highly available static websites leveraging **Amazon S3** and **CloudFront** for global content delivery.
- Architected a **multi-cloud setup** integrating AWS infrastructure with GCP services to securely consume Google Maps APIs.
- Managed **ECS production workloads** and **EC2 Linux servers (Ubuntu, Rocky Linux)**, aggressively **troubleshooting operational issues** to maintain uptime.
- Maintained server configurations, dependencies, and dynamic environment provisioning using **Ansible** playbooks and **Jinja** templates.
- Performed rigorous **audits of cloud designs** and implemented IAM least privilege policies, WAF rules, and NACLs to harden internet-facing boundaries.
- Deployed **observability** solutions using **open-source tools** (Prometheus, Grafana) alongside **CloudWatch** and **CloudTrail** to proactively manage servers, adhering to **SLA** targets and **change/incident management**.
- Executed cloud migrations of **staging environments** from Mobily Cloud to **AWS**, validating post-migration connectivity and encrypting data at rest using **AWS KMS**.
- Managed **RDS Multi-AZ setups** and robust backup strategies using **S3** snapshots, actively implementing **cost optimization strategies** across RDS and ECS workloads.
- Authored comprehensive **documentation**, runbooks, and architectural diagrams to streamline team operations.
- Supported hybrid connectivity between cloud and on-premises environments by troubleshooting VPN connectivity, routing, DNS resolution, and firewall policies to maintain secure access to internal services.

- Managed secure third-party (FAZZA) and on-premises connectivity using **FortiGate Firewalls**, configuring IPsec VPN tunnels, firewall policies, NAT, and routing to ensure reliable inter-site communication.
- Maintained server configurations, dependencies, and dynamic environment provisioning using **Ansible** playbooks and **Jinja** templates.
- Routinely investigated and resolved L2/L3 cloud infrastructure incidents, utilizing root cause analysis (RCA) and structured **problem-solving**.
- Managed daily operational chores including patching EC2 instances, auditing security groups, and rotating IAM keys to maintain compliance.
- Proactively monitored application performance metrics and refined automated alerts to resolve system bottlenecks before they impacted users.
- Collaborated with development teams during daily stand-ups to validate infrastructure updates, troubleshoot deployments, and unblock pipelines.

PROJECTS

HormuzWatch

[GitHub](#) | [Live](#)

Stack: Azure Event Hubs, Container Apps, PostgreSQL, Python, Go

- **Description:** A real-time intelligence platform built for continuous telemetry ingestion, low-latency event processing, and live geospatial queries.
- Decoupled ingestion from processing using Azure Event Hubs as the system spine for high-throughput telemetry without database backpressure.
- Implemented real-time WebSocket fanout via Container Apps (Go API) and scalable Python workers (VMSS) for anomaly detection.
- Provisioned enterprise-grade infrastructure with Terraform, utilizing Front Door Premium and VNet isolation for a hardened, SOC-ready architecture.

RaweeGo

[GitHub](#) | [Live](#)

Stack: Azure Container Apps, PostgreSQL, Blob Storage, Entra ID, Terraform

- **Description:** An AI-powered document-to-audio platform utilizing OCR and an LLMOps pipeline built with Gunicorn and Python services to produce natural voice audio streams, featuring semantic search and reading reminders.
- Architected an MVP utilizing Azure Container Apps, PostgreSQL Flexible Server, and an isolated Ubuntu VM for Python-based AI workers.
- Engineered a hardened growth phase featuring Azure Front Door Premium, WAF, and Virtual Network isolation with Private Endpoints.
- Designed automated CI/CD workflows using GitHub Actions and orchestrated multi-region deployments with Terraform and Azure Bicep.

CERTIFICATIONS

- | | |
|--|--|
| • AWS Solutions Architect Associate | • Cisco Certified (CCNP & CCNA) |
| • Azure Solutions Architect (AZ-305) | • Azure Administrator (AZ-104) |
| • HashiCorp Terraform Associate (Ongoing) | • Cisco ENCC (Ongoing) |

EDUCATION

B.Tech – CS Engineering

2018 – 2022

Global Institute of Engineering & Technology

Hyderabad, India

Relevant Coursework: Computer Networks, Scripting Languages, Cloud Computing, Cryptography & Network Security

LANGUAGES & ADDITIONAL INFO

- **Availability:** Immediate Joining
- **Languages:** English (Proficient), Arabic (Basic), Hindi (Native)
