PROFESSIONAL SUMMARY

Cloud & Network Security Engineer with 3+ years of experience in hybrid cloud infrastructure and network security across AWS and Azure. Experienced in VPC/VNet segmentation, firewall enforcement (FortiGate, Palo Alto), and secure connectivity using IPsec VPN and ExpressRoute. Hands-on with Terraform and basic CI/CD workflows, with scripting using Python and Bash for automation. Familiar with IAM (RBAC), WAF, log monitoring, and SIEM concepts, with exposure to backup and disaster recovery strategies. Strong focus on secure, highly available, and well-monitored cloud environments.

TECHNICAL SKILLS

Cloud Ecosystem:	AWS (VPC, EC2, ECS, ALB, Route 53, CloudFront, CloudWatch), Azure (VNet, NSGs, VPN Gateway, ExpressRoute)
Security & Identity:	AWS WAF, IAM (RBAC, least privilege), Security Groups, Entra ID, TLS/SSL encryption
Network Security:	FortiGate, Palo Alto NGFW, NAT, IPS/IDS, SSL VPN, IPsec VPN, Cisco ISE, network segmentation
Automation & IaC:	Terraform (modules, remote state exposure), Python (basic automation, API usage), Bash
CI/CD & DevOps:	AWS CodePipeline, CodeBuild, GitHub Actions (basic workflows), Git
Monitoring & Operations:	CloudWatch, log monitoring, SIEM (exposure), ServiceNow, ITIL concepts
Resilience (Exposure):	Backup and disaster recovery concepts (snapshots, multi-AZ, basic restore workflows)

PROFESSIONAL EXPERIENCE

Associate Cloud Engineer <i>Minute KSA</i>	Nov 2024 – Dec 2025 <i>Riyadh, Saudi Arabia</i>
--	--

- Designed and maintained **AWS VPC** architecture for **DEV/PROD environments**, utilizing public/private subnets, **Route 53**, and Security Groups to enforce network segmentation.
- Implemented IAM-based access control using roles and policies to enforce least privilege, enabling controlled administrative access to cloud resources with audit visibility.
- Supported migration of workloads from Mobily Cloud to **AWS**, enabling secure connectivity across environments by preparing source virtual networks and configuring **AWS VPC** networking (subnets, routing, and security controls), while validating data replication, cutover, and post-migration application connectivity.
- Implemented **AWS WAF** rules and NACL policies to filter L7 traffic and restrict unauthorized access to internet-facing applications.
- Managed **ECS production workloads** and **EC2 Linux workloads**, ensuring reliable inter-service communication, with exposure to **Docker** and **Kubernetes**.
- Led the implementation of **AWS CodePipeline** and **CodeBuild** CI/CD pipelines to automate application deployments and infrastructure updates.
- Provisioned infrastructure using **Terraform scripting** and modules with remote state, enabling consistent and version-controlled environment deployments.
- Developed **Python** and **Bash scripting** for running **Linux services**, log parsing, and API-based validation of cloud resources.
- Monitored infrastructure using **CloudWatch** metrics, logs, and alarms, supporting centralized logging and basic **SIEM** integration.
- Managed **RDS Multi-AZ setups** for high availability, and implemented backup strategies using **S3** snapshots and AWS backup services.
- Provided comprehensive security on **VPCs**, **RDS**, **KMS**, and **IAM**, enforcing least privilege access and network segmentation controls.

Network Infrastructure Engineer <i>Fabee Technologies</i>	Jun 2022 – Sep 2024 <i>Hyderabad, India</i>
---	--

- Performed L1/L2 network troubleshooting using **ServiceNow**, tracking issues and maintaining SLA targets.
- Managed switching environments with **Cisco Catalyst**, implementing VLAN network segmentation and STP optimization.
- Supported routing and WAN technologies (OSPF, BGP) and assisted with **Cisco Catalyst SD-WAN** deployments.
- Configured **FortiGate NGFWs (60F/100F/200F)**, implementing firewall policies, NAT, IPS/IDS, and VPNs.
- Worked on **Palo Alto NGFWs**, assisting with security policies, App-ID traffic control, **SSL decryption**, and threat prevention.
- Performed firewall rule reviews and policy optimization to enforce least privilege and improve security posture.
- Supported **Azure** hybrid networking using Virtual WAN, **ExpressRoute**, and VPN Gateways for secure connectivity.
- Implemented **Azure VNet** networking using subnets, **NSGs**, and routing controls to enable secure workload communication.
- Implemented monitoring with SNMP, Syslog, and SolarWinds, increasing network visibility.
- Administered **Cisco ISE** for **RADIUS-based authentication and authorization**, managing policy sets, dynamic VLAN assignment, and endpoint profiling to enforce identity-driven network access control.

CERTIFICATIONS

- | | |
|---|--|
| • AWS Solutions Architect Associate | • Cisco Certified (CCNP & CCNA) |
| • Azure Solutions Architect (AZ-305) | • Azure Administrator (AZ-104) |

EDUCATION

B.Tech – CS Engineering	2018 – 2022
<i>Global Institute</i>	<i>Hyderabad, India</i>

LANGUAGES & ADDITIONAL INFO

- **Visa Status:** Visit Visa / Employment Eligible – **Availability:** Immediate Joining
- **Languages:** English (Proficient), Arabic (Basic), Hindi (Native)

ADDITIONAL EXPERIENCE / LABS

- **SAP:** Familiar with SAP landscape architecture, secure communication (SAPRouter, SNC), and infrastructure/network security fundamentals.
- **PAM:** Familiar with privileged access management concepts including credential vaulting, session management, and CyberArk architecture (Vault, CPM, PSM).
